Subject: SCRIBE TRAINING - PRELIMINARY HEAD COUNT #1

All;

This is preliminary, but it appears that we may have 10 to 15 people. Rich has arranged for a room at the Lab. More information on Scribe is located at <https://www.epa.gov/ert/environmental-response-team-information-management>

While this will be a training, specific applications and questions pertaining to the NE 710, Exide, and Orange County work (any others?) should be brought up with respect to sample management and special interpretations.
